SUMMARY

Software engineer focused on fullstack web engineering and applied AI. Ship production React frontends and Spring Boot APIs at Breezeware. Comfortable owning features end-to-end from database schema to UI polish.

EXPERIENCE

Software Engineer 06/2026 - Present
Breezeware On-site

- Promoted to full-time engineer after a 10-month internship.
- Ship production React frontends and Spring Boot APIs across client and internal products.
- Own features end-to-end: schema design, API implementation, UI delivery, and post-release polish.

Software Engineer Intern 08/2025 - 05/2026
Breezeware On-site

- Shipped production features across multiple client products on React and Spring Boot.
- Participated in sprint cycles, peer code reviews, and delivering features under real project constraints.
- Earned promotion to full-time engineer at the end of the internship term.

Full Stack Developer Intern 07/2024 - 11/2024
Dnyx Business Solution Remote

- Developed and optimized web applications with Next.js and React.
- Integrated REST APIs and databases for backend functionality.
- Participated in team code reviews and debugging sessions.

Web Developer Intern 02/2024 - 07/2024
Elgi Equipments Ltd On-site

- Built the frontend for a Digital Twin dashboard visualizing real-time equipment telemetry.
- Improved operator visibility into machine state through interactive HTML, CSS, and JavaScript UI.
- Collaborated with a cross-functional team on iterative delivery.

GenAI & Data Science Intern 02/2024 - 03/2024
IBM SkillsBuild Remote

- Completed IBM SkillsBuild's GenAI & Data Science internship program.
- Gained hands-on experience with predictive modeling and analytical workflows.

KEY ACHIEVEMENTS

- Boosted Load Speed**
Increased frontend load speed by 30% using optimized React components.
- Enhanced Customer Experience**
Led development of 10 client-facing features, increasing customer satisfaction by 25%.
- Optimized API Performance**
Reduced API response time by 50% with improved Spring Boot architecture.
- Ensured Cloud Uptime**
Achieved 99.9% uptime deploying cloud solutions with AWS, enhancing reliability.

SKILLS

Languages: JavaScript, Java 17 & 21, HTML5, CSS3

Frontend: React, Next.js, TailwindCSS, shadcn/ui, Framer Motion, Responsive & Accessible UI

Backend & Data: Spring Boot, REST APIs, Supabase, SQL

State Management: Redux Toolkit, Context API

Cloud & Deploy: AWS Amplify, AWS Cognito, AWS S3, AWS CloudFront, Vercel, Netlify

UI Libraries: Radix UI, Material UI, Lucide React, Konva, Milkdown

Tools: Git, GitHub, VS Code, Ubuntu Linux, Chrome DevTools, Figma

PROJECTS

Drive — Cloud Storage (Fullstack)

- Google Drive-style platform with folders, uploads, sharing, and trash lifecycle.
- Spring Boot API, SQL persistence, AWS-backed storage; React frontend.

Learning Management System (Fullstack)

- End-to-end LMS with admin, learner, and distributor flows plus reporting.
- Built the React frontend and Spring Boot API together.

Animal Tracking System (Fullstack)

- Fullstack tracking platform with tag registration, live location, and searchable history.
- React client, Spring Boot API, relational storage.

Netflix Clone & Spotify Clone (Frontend)

- Streaming-style UI with carousels, hover previews, playlists, and audio player.
- React and TailwindCSS focused on animation and interaction polish.

EDUCATION

Bachelor of Engineering

Jansons Institute of Technology

CERTIFICATIONS

Google Cloud GenAI — GenAI Study cohorts (2023 & 2024)

Extended Reality Technology — NPTEL, 76% (2023)

Git & GitHub — Udemy (2024)

All certificates: drive.google.com/drive/folders/1Ulv0fpSDWNdS8meWK7az4atRTQGKyZjA

LEADERSHIP & ACTIVITIES

IEEE Secretary, Jansons Institute of Technology (Jun 2024 – 2025)

GDSC Member — Completed GenAI Study JIT Tracks (2023, 2024)

NSS Volunteer — Social outreach and technology drives (2022 – 2023)
