SUMMARY

Software engineer focused on fullstack web engineering and applied AI. Ship production React frontends and Spring Boot APIs at Breezeware. Comfortable owning features end-to-end from database schema to UI polish

EXPERIENCE

Software Engineer	06/2026 - Present
Breezeware	Remote
- Promoted to full-time engineer after a 10-month internship - Ship production React frontends and Spring Boot APIs across client and internal products - Own features end-to-end: schema design, API implementation, UI delivery, and post-release polish	
Software Engineer Intern	08/2025 - 05/2026
Breezeware	Remote
- Shipped production features across multiple client products on React and Spring Boot - Participated in sprint cycles, peer code reviews, and delivery-under-constraint workflows - Earned promotion to full-time engineer at the end of the internship term	
Full Stack Developer Intern	07/2024 - 11/2024
Dnyx Business Solution	Remote
- Developed and optimized web applications with Next.js and React.js - Integrated REST APIs and databases for backend functionality - Participated in team code reviews and debugging sessions	
Web Developer Intern	02/2024 - 07/2024
Elgi Equipments Ltd	Remote
- Built the frontend for a Digital Twin dashboard visualizing real-time equipment telemetry - Improved operator visibility into machine state through interactive HTML, CSS, and JavaScript UI - Collaborated with a cross-functional team on iterative delivery	
GenAI & Data Science Intern	02/2024 - 03/2024
IBM SkillsBuild	Remote
- Completed IBM SkillsBuild's GenAI & Data Science internship program - Hands-on with predictive modeling and analytical workflows

KEY ACHIEVEMENTS

- Boosted Load Speed

Increased frontend load speed by 30% using optimized React components.
- Enhanced Customer Experience

Led development of 10 client-facing features, increasing customer satisfaction by 25%.
- Optimized API Performance

Reduced API response time by 50% with improved Spring Boot architecture.
- Ensured Cloud Uptime

Achieved 99.9% uptime deploying cloud solutions with AWS, enhancing reliability.
